

QUICK START GUIDE

1. Setting up the tent

To set up your tent, open up the interactive map and place it in your favorite spot. Information about temperature, ground specifications etc. will help you take the right choice. While setting up your tent make sure you place the sticks correctly into the ground by adjusting the angle accordingly.

2. Installation of protective cloths

To install the protective cloths for your tent, open up the "Install Protective Cloths" menu. Then, you can drag and drop the cloth to your desired location on the tent. If you would like, you can follow system's advice which is based on weather conditions.

3. Setting up the Lights

To set up the lighting of the camping, open up the "Lights" menu. You can either follow system advice on light setting (which is based on environmental conditions) or adjust the light intensity, color, effects yourself, using the controls. For special occasions (events, activities), you can preset some light "scenarios" and pick them at the time you need them. Then, the system will make the necessary changes.
